Subfields Description

\$a Country of Nationality

A code representing the country of which the person or a family is a national or citizen, where the corporate body or the trademark is headquartered, the country with which the printer/publisher device is identified or where the work is composed.

The codes are to be taken from the 2-character codes of ISO 3166-1 (see Appendix A of the UNIMARC/Bibliographic format). Where an agency does not assign specific codes to this field “XX” (unknown) should be used. Mandatory. Repeatable.

\$b Locality

A code representing the locality, where a more specific code is required. The codes are to be taken from ISO 3166-2. Optional. Repeatable if there is more than one country code.

Notes on Field Contents

Any locality code should follow immediately after the country code to which it refers. When it is necessary to record more than one locality within the same country, it is recommended for ease of processing that the country code be repeated in each case, i.e., that each subfield \$b be preceded by a subfield \$a.

Additional codes:

XX nationality unknown (UNIMARC user-assigned code element)

ZZ international or multiple nationalities (i.e., more than 3)

The code XX may be used when the nationality is unknown or non applicable (e.g., a work of art or an ancient country).
