

602 SUBJECT ACCESS POINT – FAMILY NAME

Field Definition and Scope

Name of a family which is one of the subjects of the work, in access point form, with the optional addition of extra subject information.

These access points are structured in the same form as name access points for a family responsible for the content of a work or an expression and recorded in fields 52-. Subfield \$a includes the name of the family. Qualifying data are recorded in \$c, \$d and \$f.

This field can contain more than the name of the family in subfield \$a. In addition, terms may be added to the subject access point to further specify it with respect to form, topic, place or time. These follow the rules of the subject system used by the agency preparing the record.

Subfields Description

\$a Entry Element

The name of the family in access point form. Not repeatable.

\$c Type of Family

A categorization or generic descriptor for the type of family. Includes categorizations such as clan, dynasty, family unit, patriarchy, matriarchy, etc. Not repeatable.

\$d Places Associated with the Family

Information pertaining to places where the family resides or resided or had some connection. Repeatable.

\$f Dates

The dates of a family when they are required as part of the access point. Not repeatable.

\$j Form Subdivision

A term added to the subject access point to further specify the kind(s) or genre(s) of material. Agencies not using this subdivision should use \$x instead. Repeatable.

\$x Topical Subdivision

A term added to a subject access point to further specify the topic the subject access point represents. Repeatable.

\$y Geographical Subdivision

A term added to a subject access point to specify a place in relation to a family which the subject access point represents. Repeatable.

\$z Chronological Subdivision

A term added to a subject access point to specify the period in time in relation to a family which the subject access point represents. Repeatable.

\$o International Standard Name Identifier

The ISNI or other international identifier assigned to the name recorded in the field. The first four character positions contain an alphabetic code specifying the nature of the identifier; in the case of an ISNI, this code corresponds to the letters preceding the number. Repeatable.

\$2 Source

Identification in coded form of the system from which the subject access point is derived.

Not repeatable. It is recommended that subfield \$2 always be present in each occurrence of the field. For a list of system codes, see UNIMARC/Bibliographic format, Appendix A. Not repeatable.

See also specification of [Control Subfield 2](#).

\$3 Authority Record Identifier or Standard Number

The control number for the authority record for the family for which a subject access point is established in the record for a work. Repeatable.

See also specification of [Control Subfield 3](#).

\$R Real World Object URI

See specification of [Control Subfield 3](#). Repeatable.
