

225 SERIES

Field Definition

This field contains the title of the series along with any other title information and statements of responsibility relating to the title including any of the preceding repeated in other languages, in the form and sequence in which they appear on the item being catalogued. It corresponds to the ISBD Series Area.

Occurrence

Optional. Repeatable when an item is in more than one series.

Indicators

Indicator 1: Form of Title Indicator

The access point form of the series should be recorded in a linking entry 410 field. This indicator specifies whether the series statement is the same as the access point form as recorded in field 410.

0 Not the same as the established form

The agency preparing the record considers the access point form in 410 differs from the series statement in 225 (EX 1, 6).

1 No established form

No access point form has been established: therefore there is no corresponding title in 410 (EX 2).

2 Same as the established form

The agency preparing the record considers the data in field 225 to be equivalent to the established form.

In all cases it is recommended that any established form be entered in field 410.

Indicator 2: blank (not defined)

Subfields

\$a Series Title

The title of the series in the form in which it appears on the item being recorded. Not repeatable.

\$d Parallel Series Title

The title of the series in another language and/or script relating to the series title appearing in subfield \$a. Repeatable for each additional parallel series title (EX 3).

- \$e** Other Title Information
Subtitles and other title information that appear on the item subordinate to the series title in \$a or \$d or to the name of a part in \$i (EX 4). Repeatable for each segment of other title information and for parallel other title information.
- \$f** Statement of Responsibility
The statement of responsibility for a title appearing in \$a or \$d (EX 1) or for a numbered or named part within the series appearing in \$h or \$i (EX 5). Repeatable for additional statements of responsibility and for parallel statements of responsibility.
- \$h** Number of a Part
The section or part number of the series in \$a. Repeatable for each subsection or lower level division or for a parallel part number (EX 3).
- \$i** Name of a Part
The section or part name of the subseries when the series entered in \$a is divided into subseries. Repeatable for each lower level of subseries or for a parallel subseries name (EX 3, 5).
- \$v** Volume Designation
The number of the item being recorded within the series entered in field 225, and any term used in the item to designate it, which may be in abbreviated form (EX 1, 2, 3, 4, 5). Repeatable (EX 3).
- \$x** ISSN of Series
The ISSN of the series, entered as an 8-digit number with a hyphen between the 4th and 5th digits. The term ISSN is omitted and should be generated on output (EX 1). Repeatable when the series and subseries each has an ISSN.
- \$z** Language of Parallel Title
Coded identification of the language of a parallel title that appears in a \$d subfield (EX 3). If \$d is repeated, this subfield is repeated, the languages identified reflecting the order of the parallel titles. This subfield and any repetitions of it always come last in the field. See Appendix A for language codes.

Notes on Field Contents

ISBD information:

The data in the field should be entered in the form and sequence as on the piece as specified in ISBD for the Series Area. Subfield \$z is not an ISBD data element. The correspondence between this field and ISBD is illustrated below. The text within the ISBD series area is enclosed within parentheses '()' which are not carried in the UNIMARC record.

UNIMARC Subfield	Element name	ISBD(G) Section	Preceding punctuation
\$a	Series title	6.1	New area
\$d	Parallel series title	6.2	=
\$e	Other title information	6.3	:
\$f	Statement of responsibility	6.4	/
\$h	Number of a part	6.1	.
\$i	Name of a part	6.1	, if after \$h, else .
\$v	Volume designation	6.6	;
\$x	ISSN of series	6.5	,

Parallel data:

Parallel data appearing on the item, i.e. data repeated in another language or script, is denoted in ISBD by the use of equals sign followed by a space '= ' at the start of any block of parallel data. In this field, the subfield identifier \$d will generate '= ' automatically (EX 3). If '= ' is required by ISBD rules at the start of any other subfield, it must be entered explicitly. The equals sign and space then replaces any other punctuation that would normally be generated at the subfield boundary.(EX 6).

Subfield content:

This field is used only for the series belonging to the item whose title is entered in field 200. If the record is for an item which is a continuing resource or series, field 225 is used only if that continuing resource or series itself belongs to a series. The title of the continuing resource or series being catalogued is entered in field 200 (see field 200, EX 3).

When the source record does not contain the series title in the form as on the piece, no attempt should be made to create it from an established form of the series title. The established form may be entered in field 410 and a note on the series title may be created from it.

When the record of a series has what may be either a subtitle or a subseries title but it is not possible to determine which of the two it is, prefer to code it as subfield \$e Other title information. Number and name of part are one data element in ISBD and some source formats may not be able to distinguish. In these cases when converting to UNIMARC prefer \$i to \$h.

Related Fields

011 ISSN

The ISSN of a series title entered in field 200 is entered in field 011. 225 \$x relates only to the ISSN of a continuing resource title in 225 \$a or \$i.

410 SERIES

The established form of a series title may be entered in a 200 field embedded in field 410.

411 SUBSERIES

The established form a subseries title may be entered in a 200 field embedded in field 411.

461 SET

Field 461 is used when an agency which uses a record structure that emphasises linking separate records for the data from various levels requires a reference to a record describing a continuing resource.

530 KEY TITLE

If the series has a key title, it should not be entered in field 530 as that contains the key title of the work whose title is in 200\$a. If the series has a key title, it may be noted in field 308.

7-- RESPONSIBILITY BLOCK

If access is required to the name of any persons or bodies entered in subfield \$f, the access form of the name should be entered in a 7-- field or in a 7-- field embedded in a field 410 or 411.
