

337 SYSTEM REQUIREMENTS NOTE (ELECTRONIC RESOURCES)

Field Definition

This field is used to record technical information about an electronic resource, such as the presence or absence of certain kinds of codes or the physical characteristics of the file (e.g. recording densities, parity, or blocking factors). For software, data such as the software programming language, the number of source program statements, computer requirements (e.g. computer manufacturer and model, operating system, or memory requirements), and peripheral requirements (e.g. number of tape drives, number of disk or drum units, number of terminals, or other peripheral devices, support software or related equipment) can be recorded. For remote access items, information about the mode of access may be recorded. The field is equivalent to the ISBD(ER) Notes on systems requirements.

Occurrence

Optional. Repeatable. If field 856 is not used (in a record describing an electronic resource), then 337 must be present

Indicators

Indicator 1: blank (not defined)

Indicator 2: blank (not defined)

Subfields

\$a Text of Note. Not repeatable.

\$u Uniform Resource Identifier (URI)

The Uniform Resource Identifier (URI), for example a URL or URN, which provides electronic access data in a standard syntax. This data can be used for automated access to an electronic resource through one of the Internet protocols. Subfield \$u may be used to point to a page(s)/site(s) holding relevant technical information about an electronic resource. Repeatable

Notes on Field Contents

Electronic location and access field 856 provides detailed coded information for access, the mode of access note may be brief. It may begin with the words "Mode of access:" (EX 8) though other wording may be used (EX 9, 10).
