Notes on Field Contents

\$a/0-7 Date entered on File

8-numeric characters in ISO standard form (ISO 8601-1) for dates: YYYY MMDD where YYYY represents the year, MM the month with leading 0 if necessary and DD the day of the month with leading 0 if necessary.

The date will usually be the date when the record was originally created and entered into machine-readable form, to give some idea of the age of the record. A record corrected because of errors in keying or editing will not have a change of date. On exchange, the record should also retain its original date.

EX 1
Character positions 0-7: 19671005
The record was originally entered into a machine readable data file on 5th October 1967.

\$a/8-16 Type of Date; Dates 1 and 2

1-character code indicates the type of date according to 13 categories which take into account the issuing or creation status of the resource being recorded. This code defines the types of dates which appear in

Date 1 (character positions 9-12) and Date 2 (character position 13-16). These dates are always entered as a four character representation of the year.

Note: It may not be possible always to provide blanks as required for dates from source formats where any digit has been supplied as an approximation in a corresponding field.

Related field: A date is also entered in field 210 or 214. The date of coverage if different from the date of publication may be entered in field 122 (see [EX 4](#))

a	currently published continuing resource	Date 1 contains the beginning year of publication or coverage if coverage differs from publication (EX 1). If the beginning date is uncertain, any unknown digit may contain a blank (EX 2). Date 2 contains 9999.
b	continuing resource no longer being published	Date 1 contains the beginning year of publication or coverage if coverage differs from publication. If the beginning date is uncertain, any unknown digit may contain a blank. Date 2 contains the year publication ceased (EX 3). For resource known to have ceased but whose final date is uncertain, any unknown digit may contain a blank. (EX 4)
c	continuing resource of unknown status	A continuing resource about which it is not known whether publication is continuing or whether publication has ceased (EX 5). Date 1 contains the beginning year of publication or coverage if coverage differs from publication. If the beginning date is uncertain, any unknown digit may contain a blank. Date 2 contains four blanks.
d	monograph complete when issued, or issued within one calendar year	A monograph published in one volume/part or in a number of volumes/parts all published at one time or with the same date of publication, i.e. published within the same calendar year (EX 6-9). If the date is uncertain use code "P". If the monograph was published over a span use code "g". Date 1 contains the date of publication. Date 2 contains blanks.
e	reproduction of a document	The resource being catalogued is a reproduction, i.e. a reprint, facsimile, reissue, etc. but not a new edition (EX 10). If the reproduction is of a continuing resource, or if either the original or the reproduction was published over a span of years, the beginning year of reproduction and publication are used (EX 11). Date 1 contains the date of publication of the reproduction. Date 2 contains the date of publication of the original. If either date is uncertain and cannot be expressed as a single year, any digit may be replaced by a blank (EX 12).
f	monograph, date of publication uncertain	Date 1 contains the earliest possible date of publication. Date 2 contains the latest possible date of publication (EX 13-16).
g	monograph whose publication continues for more than a year	Date 1 contains the beginning year of publication (EX 17-19). If the beginning year of publication is uncertain, any unknown digit may be replaced by a blank. Date 2 contains the date of final publication (EX 17) or 9999 if publication is still in progress (EX 18). If the final date of publication is uncertain, the unknown digits contain blanks (EX 19).
h	monograph with both actual and copyright/privilege date	The resource's date of publication differs from the copyright/privilege date quoted in the resource (EX 20). If the date of publication is unknown, use "d" (EX 8). Privilege is defined as a monopoly granted by a government body to an author or a bookseller for an edition over a fixed period of time. Date 1 contains the date of publication. Date 2 contains the copyright/privilege date.

i	monograph with both release/issue date and production date	Used for films, music, etc. when there is a gap between the production/recording of the resource and its distribution/release (EX 21). Date 1 contains the release/issue date. Date 2 contains the production date.
j	document with detailed date of publication	Use when it is considered important to record the month (and possibly day) of publication (EX 22). Date 1 contains the year of publication. Date 2 contains the detailed date in the form “MMDD”, with month and day right-justified with zero fill. If the day positions are not used, they hold blanks (EX 23).
k	monograph published in a certain year and printed in a different year	Most commonly found in antiquarian materials (EX 24 , 25). Date 1 contains the year of publication. Date 2 contains the year of printing.
l	inclusive dates of collection	Date 1 contains the earliest year of material in collection. If the earliest year of material is uncertain, any unknown digit may be replaced by a blank. Date 2 contains the latest year of material in collection (EX 28-29). If all resources in the collection were created within one calendar year that date is given in both places. If the latest date of material in the collection is uncertain, any unknown digit may be replaced by a blank.
u	date(s) of publication unknown	Date 2 contains blanks.

Related field: For coded information indicating the intended audience of work or an expression of a work see UNIMARC Authorities Format Manual, field 125.

\$a/20 Government Publication

1-character code indicates whether the record is for a government publication or not and the level of government issuing the publication. A government publication is defined as one issued or financed by a government agency. Academic institutions are not to be regarded as government agencies.

a	federal/national	Sovereign states and territories with some measure of self-government, for example having their own legislature.
b	state/province	An administrative subdivision at one level below the federal or national level, having some measure of internal self-government and legislative control, though with no responsibility for external affairs, e.g. provinces of Canada, Länder in the Federal Republic of Germany.
c	county/departmen t	A middle-level administrative subdivision, generally without any legislature, e.g. départements in France, counties in the United Kingdom.
d	local (municipal, etc.)	An administrative unit at the lowest level of jurisdiction, e.g. a city, town, or village.
e	multi-local (interstate departments, etc. below the national level)	Any administrative unit below the national level combining or crossing more than one jurisdiction, e.g. a joint computer unit which is shared by a number of municipal authorities or a transport authority that crosses several municipalities.
f	intergovernmental	International organisations and their agencies, e.g. those entities which are capable of making treaties with sovereign states such as the International Monetary Fund or the United Nations.
g	government in exile or clandestine	A non-official government such as the government of France in exile from 1941-1944.
h	level not determined	Used when the record is for a government publication but the level of government cannot be determined from the information at hand.
u	unknown	Used when it is impossible to determine whether the work is a government publication.
y	not a government publication	This code is entered in all cases when the document is not a government publication.

z	other government level	Used when the record is for a government publication at a particular level of government but this level does not fit into any of categories a-g.
---	------------------------	--

\$a/21 Modified Record Code

1-character code indicates whether the character set available is sufficient to transcribe the data as found on the resource. Due to limitations of the machine character set, the transcription may have to be modified to accommodate, for example, special scripts (i.e. by transliteration) or special mathematical formulae, e.g. a Greek letter or other notation written out in full. A record would not be considered modified, however, if the title page cannot be transcribed because it contains symbols or pictures which obviously would be found in no other character set.

0	unmodified record
1	modified record

\$a/22-24 Language of Cataloguing (Mandatory)

3-character code indicating the language used in cataloguing. For codes use ISO 639-2

(<https://www.loc.gov/standards/iso639-2/>).

If a source record is completely multi-lingual, i.e. all information not from the title page is repeated in more than one language, it is recommended that a separate UNIMARC record should be produced, as required, for each language. See also Format structure 3.9.

UNIMARC has no mechanism to denote the language of individual fields throughout the format.

\$a/25 Transliteration Code

UNIMARC assumes the utilisation of international standards. However, in the area of conversion of scripts, international standards are not yet completely adequate, and other schemes may be used. This code indicates whether or not an ISO transliteration scheme is used in the record.

a	ISO transliteration scheme	
b	other	Used for identified transliteration schemes for which no specific code has been defined.
c	multiple transliterations	ISO or other schemes.
d	transliteration table established by the national bibliographic agency	
e	transliteration without any identified transliteration scheme	
f	other identified transliteration scheme	
g	ALA-LC romanization table	
h	DIN transliteration scheme	
y	not applicable	No transliteration scheme used.

\$a/26-29 Character Sets (Mandatory)

Two 2-character codes designating the principal graphic character sets used in communication of the record. Positions 26-27 designate the G0 set and positions 28-29 designate the G1 set. If a G1 set is not needed, positions 28-29 contain blanks. For further explanation of character coding see [Appendix D](#). The following two-character codes are to be used. They will be augmented as required.

01	ISO 646, IRV version (basic Latin set)
02	ISO Registration # 37 (basic Cyrillic set)
03	ISO 5426 (extended Latin set)
04	ISO 5427 (extended Cyrillic set)
05	ISO 5428 (Greek set)
06	ISO 6438 (African coded character set)
07	ISO 10586 (Georgian set)
08	ISO 8957 (Hebrew set) Table 1

10	[Reserved]
11	ISO 5426-2 (Latin characters used in minor European languages and obsolete typography)
50	ISO 10646 Level 3 (Unicode, UTF-8)

\$a/30-33 Additional Character Sets

Two 2-character codes indicate up to two additional graphic character sets used in communication of the record. The two-character codes specified for character positions 26-29 are used. Positions 30-31 designate the G2 set and positions 32-33 designate the G3 set. If no additional character sets are needed the bytes contain blanks.

\$a/34-35 Script of Title

2-character code indicating the script of the title used as the title proper. This refers to the script in the resource, not the character set of the record.

The following codes are recommended for use in UNIMARC. ISO codes have been developed in ISO 15924, but are not yet implemented in UNIMARC.
