

327 CONTENTS NOTE

Field Definition and Scope

This field contains a note describing the contents of the resource.

Includes titles of separate works or parts of a resource or the table of contents.

Repeatable if the field is structured (Indicator 2 = 1) to record the table of contents of the described resource.

Indicators Description

Indicator 1: Completeness Indicator

Specifies the level of completeness of recording the content of the resource.

Value #: Undetermined

Use in the case of a structured field that is repeated.

Value 0: Incomplete contents

Content information is not fully available to be recorded. ([EX 5](#)).

Value 1: Complete contents

Content is fully recorded. ([EX 1](#), [2](#), [3](#)).

Value 2: Partial contents

Only selected content is recorded. ([EX 4](#), [6](#)).

Indicator 2: Structure Indicator

This indicator specifies whether or not the field is structured.

\$u Uniform Resource Identifier (URI)

A Uniform Resource Identifier (URI), such as a URL (Uniform Resource Locator) or URN (Uniform Resource Name), serves as a standardized string that identifies a resource and provides electronic access via internet protocols. This allows for automated retrieval or interaction with the resource in a consistent manner.

Subfield \$u may be used when an electronic version of the table of contents is available (digitized extract of the resource described in the record, part of an electronic resource). Repeatable.

\$z Other Information Concerning a Subdivision

Repeatable.

Notes on Field Contents

The data relating to each component part should be entered in this field in a separate occurrence of subfield \$a. The data may be in any form, but it is recommended that ISBD data element definitions and punctuation be used if the title is followed by statement of responsibility ([EX 1](#)). If, however, the name of the author is placed before the title, it should be entered in access point form and followed by the title ([EX 3](#)). Punctuation may be included at subfield boundaries ([EX 2, 3](#)).

When the contents note is *complete* (Indicator 1 = 1), the term “*Contents:*” or its equivalent should not be entered since this can be created automatically as a print constant when the contents note is output ([EX 1, 2, 3](#)).

When the contents note is *not complete* (Indicator 1 = 0), the phrase “*Incomplete contents:*” or its equivalent should not be entered since this can be created automatically as a print constant when the contents note is output ([EX 5](#)).

When the contents note is *partial* the appropriate introductory text, which may take several different forms, must be entered manually ([EX 4, 6](#)). It is important to avoid ambiguous terms which may give the impression that the item is defective and lacks some of its text. If the note does refer to a specific item, rather than to all the copies of an edition, then field 316, Note Relating to the Item, should be used (see example there).

When the contents note is unstructured (Indicator 2 = #), if the full text of the contents note is entered in subfield \$a, repeated as necessary ([EX 1-3](#)), using punctuation as necessary and no other subfields are used. When the contents note is structured (Indicator 2 = 1), \$a is not used but any other subfields are used.

Related Fields

464 PIECE-ANALYTIC LEVEL	Field 464 may also be used to describe an entity at the piece-analytic level, and a note may be created directly from each 464 field.
856 ELECTRONIC LOCATION AND ACCESS	This field applies to the whole resource described in the record and/or reference files related to the described resource such as thumbnails and content pages. It cannot be used to provide electronic access to any other part of the resource described in the record.
