Punctuation

Certain types of notes may follow ISBD rules for content and form, including punctuation. Although this is not prescribed within UNIMARC, it is recommended that ISBD conventions be followed where possible.

General Notes

Field 300 has two uses: it is for general notes that do not belong under any of the more specific categories of notes; and it is for notes that belong to other categories but which were not so categorized by the source format, or were coded in the source format as belonging to a category which is not present in UNIMARC. If a note belongs to more than one category represented by fields 301 to 315, then the tag earlier in numerical order other than 300 should be used as a general rule. Notes relating to fields 320 onwards should be entered in those specific fields and not in earlier fields. If two notes belong to the same category they should be contained in separate occurrences of the required field.

Notes Generated from Linking Fields

From the UNIMARC record, a note may be generated from data in other fields, e.g. 4-- linking fields or 5-- related title fields. If such a note is to be generated, it is not entered in a 3-- field.

It may be used in place of any of the note fields 301 to 315 or, when source formats do not provide the same categorization of notes as UNIMARC, in place of any note which cannot be allocated to a more specific notes field.

Parallel titles omitted from the title and statement of responsibility may be noted here ([EX 5](#)). If more than one note is to be recorded, each is entered in a repeated field 304.

This field contains notes which relate to data found in the 4-- LINKING ENTRY BLOCK. Data in the 4-- fields may be used to print a note. If the note that would be printed from them would not adequately indicate the relationship and the resource that is related, a note can be entered in 311 (and the indicator of the corresponding 4-- field(s) set to 0 so that a note will not be automatically generated by those fields). In particular, specific relationships between the resource being catalogued and another resource referred in field 488 can be entered here. If more than one note is to be recorded, then each is entered in a repeated field 311.

This allows for automated retrieval or interaction with the resource in a consistent manner.

Subfield \$u may be used to link to a website. Repeatable.

\$5 Institution to which the Field Applies

Name of the institution to which field applies in the coded form if it is considered necessary by the agency which creates the record to identify specific attributes of an item.

If the subfield is used codes should be entered in accordance with the provisions of International Standard Identifier for Libraries and Related Organizations (ISIL), [ISO 15511](#) or may contain codes from [MARC Code List for Organizations](#), otherwise, the full name of the agency or a national code may be used.

If the institution holds more than one copy the shelfmark of the item should be added after a colon. Not repeatable.

This subfield contains information allowing the field to be linked for processing purposes to other fields in the record. (See section 3.13 Interfield Linking Data, 3 Format structure).

The instructions for the use of this subfield form the first part of Section 3.13. \$6/0 Linking explanation code will always have the value “b” = Link associated with an item, unless an alternative graphic representation or script is involved.

Notes on Field Contents

In this field characteristics of the item are described, e.g. wanting leaves, copy characteristics, binding, artificial titles, numbered copies of an edition, manuscript notes on title page or margins, bound leaves,

items, etc. For many older publications it will not be readily ascertainable whether the characteristics of a single item are shared by other or all copies. Code of the institution and the copy to which the Note Relating to the Item field applies are recorded in \$5.

This field can contain the following characteristics of the item:

- description of resource “Bound with” (“Artificial collections”), if the institution does not use fields 481 / 482 ([EX 4](#), [13](#))
- item characteristics ([EX 1](#), [5](#), [6](#))

The library owns a print copy of an older monography, for which a digital copy is available on another library's digital repository. The union catalog policy is to establish distinct records for digital copies. As the library doesn't want to import the record for the digitization of another item, but to provide its users a direct link to the content, a local note is added.

326 FREQUENCY STATEMENT NOTE (CONTINUING RESOURCES)

Field Definition and Scope

This field contains a note indicating the frequency with which a continuing resource is issued.

If it is desired to note frequency at different periods during the existence of the continuing resource, the field should be repeated, the directory entries for the repeated fields being ordered with most recent frequency first ([EX 2](#)).

Subfields & Occurrence

Indicators

Indicator	Value	Description
1	#	blank (not defined)
2	#	blank (not defined)

Subfields Description

\$a Frequency

A statement indicating the frequency with which a continuing resource is issued. Not repeatable.

\$b Dates of Frequency

The date span over which the frequency mentioned in subfield \$a applies. Not repeatable.

Notes on Field Contents

There is no standard form for the data in this field. It may be omitted when the data could be generated from a code in field 110 character position 1, as in [EX 1](#). Agencies preparing records should be consistent in the use of the fields in such circumstances.

Related Fields

Being limited to one character position, it cannot record complex situations which may be explained in field 326.

327 CONTENTS NOTE

Field Definition and Scope

This field contains a note describing the contents of the resource.

Includes titles of separate works or parts of a resource or the table of contents.

Indicators Description

Indicator 1: Completeness Indicator

Specifies the level of completeness of recording the content of the resource.

Value #: Undetermined

Use in the case of a structured field that is repeated.

Value 0: Incomplete contents

Content information is not fully available to be recorded. ([EX 5](#)).

Value 1: Complete contents

Content is fully recorded. ([EX 1](#), [2](#), [3](#)).

Value 2: Partial contents

Only selected content is recorded. ([EX 4](#), [6](#)).

Indicator 2: Structure Indicator

This indicator specifies whether or not the field is structured.

\$u Uniform Resource Identifier (URI)

A Uniform Resource Identifier (URI), such as a URL (Uniform Resource Locator) or URN (Uniform Resource Name), serves as a standardized string that identifies a resource and provides electronic access via internet protocols. This allows for automated retrieval or interaction with the resource in a consistent manner.

Subfield \$u may be used when an electronic version of the table of contents is available (digitized extract of the resource described in the record, part of an electronic resource). Repeatable.

\$z Other Information Concerning a Subdivision

Repeatable.

Notes on Field Contents

The data relating to each component part should be entered in this field in a separate occurrence of subfield \$a. The data may be in any form, but it is recommended that ISBD data element definitions and punctuation be used if the title is followed by statement of responsibility ([EX 1](#)). If, however, the name of the author is placed before the title, it should be entered in access point form and followed by the title ([EX 3](#)). Punctuation may be included at subfield boundaries ([EX 2, 3](#)).

When the contents note is *complete* (Indicator 1 = 1), the term “*Contents:*” or its equivalent should not be entered since this can be created automatically as a print constant when the contents note is output ([EX 1, 2, 3](#)).

When the contents note is *not complete* (Indicator 1 = 0), the phrase “*Incomplete contents:*” or its equivalent should not be entered since this can be created automatically as a print constant when the contents note is output ([EX 5](#)).

When the contents note is *partial* the appropriate introductory text, which may take several different forms, must be entered manually ([EX 4, 6](#)). It is important to avoid ambiguous terms which may give the impression that the item is defective and lacks some of its text. If the note does refer to a specific item, rather than to all the copies of an edition, then field 316, Note Relating to the Item, should be used (see example there).

When the contents note is unstructured (Indicator 2 = #), if the full text of the contents note is entered in subfield \$a, repeated as necessary ([EX 1-3](#)), using punctuation as necessary and no other subfields are used. When the contents note is structured (Indicator 2 = 1), \$a is not used but any other subfields are used.
