

410 SERIES

Field Definition and Scope

This field is used to link the resource being catalogued to a series that contains it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Field 410 contains an upward link to a series when the resource catalogued is either a series or monograph. If an upward link to both a series and its subseries is required, then the 410 may be repeated for citations to each, the higher level preceding the lower. Alternatively when the record structure emphasizes linking separate records in a hierarchy, the series may be linked through a 461 SET field and the subseries through a 462 SUBSET field.

The indicator value for this field indicates whether a note should be generated from the field; it does not contain information concerning the existence or generation of a series statement (field 225).

Related Fields

225 SERIES	Field corresponds to the ISBD Series and Multipart Monographic Resource Area. Field 410 is used for an access point form of the series entry. When the access point form is considered by the agency preparing the record to be identical to the form in field 225, the first indicator of 225 will note this. Nevertheless, the data is still included in field 410 (EX 2).
461 SET	If the 46- hierarchical links are being used then an upward link to a series may be indicated through a 461 field.
462 SUBSET	If the 46- hierarchical links are being used then an upward link to a subseries may be indicated through a 462 field.

The document being catalogued is in a series for which an access point needs to be made. A series statement on the resource and recorded in the 225 field differs from the access point form of name for the series. Field 410 contains that form. No note is to be printed from field 410.
