

410 SERIES

Field Definition and Scope

This field is used to link the resource being catalogued to a series that contains it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Field 410 contains an upward link to a series when the resource catalogued is either a series or monograph. If an upward link to both a series and its subseries is required, then the 410 may be repeated for citations to each, the higher level preceding the lower. Alternatively when the record structure emphasizes linking separate records in a hierarchy, the series may be linked through a 461 SET field and the subseries through a 462 SUBSET field.

The indicator value for this field indicates whether a note should be generated from the field; it does not contain information concerning the existence or generation of a series statement (field 225).

Related Fields

225 SERIES	Field corresponds to the ISBD Series and Multipart Monographic Resource Area. Field 410 is used for an access point form of the series entry. When the access point form is considered by the agency preparing the record to be identical to the form in field 225, the first indicator of 225 will note this. Nevertheless, the data is still included in field 410 (EX 2).
461 SET	If the 46- hierarchical links are being used then an upward link to a series may be indicated through a 461 field.
462 SUBSET	If the 46- hierarchical links are being used then an upward link to a subseries may be indicated through a 462 field.

Examples

EX 1
Embedded fields technique
225 0#\$aLetters from China
410 #0\$12001#\$aLetters from China\$1700#1\$aStrong,\$bAnna Louise,\$f1885-1970
Standard subfields technique
225 0#\$aLetters from China
410 #0\$tLetters from China\$aStrong, Anna Louise, 1885-1970
The document being catalogued is in a series for which an access point needs to be made. A series statement on the resource and recorded in the 225 field differs from the access point form of name for the series. Field 410 contains that form. No note is to be printed from field 410.
EX 2
Embedded fields technique
225 2#\$aCambridge Greek and Latin classics
410 #0\$12001#\$aCambridge Greek and Latin classics
Standard subfields technique
225 2#\$aCambridge Greek and Latin classics
410 #0\$tCambridge Greek and Latin classics
The document being catalogued is in a series for which an access entry is required by the cataloguing code. The form of entry in field 225 is the same as the established form in field 410.

411 SUBSERIES

Field Definition and Scope

This field is used to link the continuing resource (series) being catalogued to a subseries that is contained in it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is to be used only in records for continuing resources (series) to indicate a downward link to a subseries that is part of the continuing resource title recorded in field 200.

Related Fields

410 SERIES	The 411 field indicates a downward link from a series to a subseries. If the resource being catalogued is a subseries and an upward link to the series is required, field 410 is used.
462 SUBSET	If the 46- hierarchical links are being used then a subseries may be linked to a series being catalogued through field 462.

Examples

EX 1
Embedded fields technique
411 #1\$12001#\$aEngineering series\$12250#\$hA
Standard subfields technique
411 #1\$tEngineering series\$hA
The resource being catalogued is the continuing resource <i>Copper information</i> which has a subseries entitled <i>Engineering series</i> which is labelled <i>A</i> within the continuing resource.

412 SOURCE OF EXCERPT OR OFFPRINT

Field Definition and Scope

This field is used to identify a linked resource which was the source of an excerpt or offprint.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

An offprint or an excerpt is a unique bibliographic entity, the contents of which had already been published in another unique bibliographic entity.

Related Fields

413 EXCERPT OR OFFPRINT	Field 413 is used for the reciprocal of the relationship indicated by field 412.

421 SUPPLEMENT

Field Definition and Scope

This field is used to link the resource being catalogued to another resource that is its supplement.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used in both continuing resource and monograph records to link to a supplement.

Related Fields

422 PARENT OF SUPPLEMENT	Field 422 is used for the reciprocal of the relationship indicated by field 421.

A further example of the use of this field appears as EX 2 of the 4-- LINKING ENTRY BLOCK.

423 ISSUED WITH

Field Definition and Scope

This field is used to link the resource being catalogued to another bibliographic resource that is issued with it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

When one resource is issued with another, it is not implied that either resource is subsidiary to the other, as is the case with a supplement/parent relationship.

Related Fields

482 BOUND WITH	This field contains a description of the resource that is bound first in an “artificial” collection, i.e. not found with the other resources as issued.

424 IS UPDATED BY

Field Definition and Scope

This field is used to link the resource being catalogued to another resource that updates its content.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

The relationship expressed by field 424 is typically that between an updating loose-leaf (monograph) and its updates, usually published as a continuing resource. However, the relationship can also express the link between two continuing resources. Field 424 expresses the link from the monograph or a continuing resource to the updating publication.

Related Fields

425 UPDATES	Field 425 is used for the reciprocal of the relationship indicated by field 424.
421 SUPPLEMENT	Field 421 is used to link the resource being catalogued to another resource that is its supplement.

425 UPDATES

Field Definition and Scope

This field is used to link the resource being catalogued and that is an update to another resource that is updated by its content.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

The relationship expressed by field 425 is typically that between an updating loose-leaf (monograph) and its updates, usually published as a continuing resource. However, the relationship can also express the link between two continuing resources. Field 425 expresses the link from the updating publication to the one being updated.

Related Fields

424 IS UPDATED BY	Field 424 is used for the reciprocal of the relationship indicated by field 425.
422 PARENT OF SUPPLEMENT	Field 422 is used to link the supplement being catalogued to the parent of that supplement.
