

4-- LINKING ENTRY BLOCK

Structure of Linking Entry Fields

This structure applies to all 4-- linking entry fields.

Definition and Scope of Fields

For the conversion reason the technique of embedded fields has been supplemented by a technique using standard subfields. The structure of the agency's records will determine which system of linking entry fields is used.

Where there is a choice of system, the agency should weigh the advantages of the linking entry system, which allows fuller although more complex entries, against the advantages of the standard subfield system, which is easier to implement.

A statement that linking fields are present or absent together with a note of the type of contents in such linking fields, should be given in the documentation to accompany exchange records. For details, see [Appendix D](#).

Within the Linking Entry Fields Section, both methods are described in the order: (A) embedded fields technique then (B) the standard subfields technique. All examples illustrate both methods.

Each linking entry field in a record will contain subfields that identify the resource to which the link is being made. The data in this field should be sufficient to identify the record for the resource being linked to, or, if there is no record, to identify the resource itself.

In the following list the fields are labelled by the type of record to which the link is being made, e.g. 410 SERIES is used in a sub-series record to link to the series of which it is a part.

For certain categories of linking fields (notably 46- Level linking fields) there is a restriction on the type of link which may be made. Details are given in Notes on Field Contents for such fields.

The following fields are defined:

Series, supplements, etc.	
410 SERIES	
411 SUBSERIES	
412 SOURCE OF EXCERPT OR OFFPRINT	413 EXCERPT OR OFFPRINT

Indicators

Indicator	Value	Description
1	#	blank (not defined)

2		Note Indicator
	0	Do not make a note
	1	Make a note

Indicators Description

Indicator 2: Note Indicator

The second indicator indicates whether the agency providing the record would use the data in this field to make a note for print or other displays of the record. If a note is not required, this indicator should be set to 0 ([EX 1](#), [4](#), [6](#)). The kinds of notes envisaged being created using this data are illustrated in the examples ([EX 2](#), [3](#), [5](#)). When the record is displayed, the specific field tag may be translated into text that describes the exact relationship of the resource to which the link is being made and the resource being catalogued: the exact wording of the text depends on the practices of the agency receiving the record.

(A) Subfields Description: Embedded Fields Technique

\$1 Linking Data

Each \$1 (one) subfield contains a data field complete with tag, indicators, and subfield codes. Repeatable for each embedded field.

Notes on Field Contents: Embedded Fields Technique

Each linking field is formatted as follows:

Indicator	Subfield Identifier	Subfield Data	Subfield Identifier	Subfield Data		F/T
#0 or #1	\$1	Embedded tag, indicators and subfields	\$1	Embedded tag, indicators and subfields	...	

F/T = Field Terminator

It is recommended that embedded fields are entered in numerical order of tag within each field. In the case of an embedded 001 field, neither indicators nor subfield identifiers are defined so that the subfield data includes only the tag and the number ([EX 1](#)).

If a linking field contains the record identifier of the linked record, this record should be included in the same file for distribution purposes.

Linking fields constructed from a full record should contain the following required data when present:

001 RECORD IDENTIFIER
500 PREFERRED TITLE ACCESS POINT
or (if 500 not present in the record)
200 \$a Title Proper
7-- INTELLECTUAL RESPONSIBILITY BLOCK (if present) (usually primary)
206 MATERIAL SPECIFIC AREA: CARTOGRAPHIC RESOURCES – MATHEMATICAL DATA

The following fields may optionally be included:

010 ISBN
011 ISSN
040 CODEN
101 LANGUAGE OF THE WORK
102 COUNTRY OF PUBLICATION OR MANUFACTURE
123 CODED DATA FIELD: CARTOGRAPHIC RESOURCES – SCALE AND COORDINATES
130 CODED DATA FIELD: MICROFORMS – PHYSICAL ATTRIBUTES
200 \$a Title proper [if not already included]

200 \$f First Statement of Responsibility
200 \$h Number of Section or Part
200 \$i Name of Section or Part
200 \$v Volume Designation
205 EDITION STATEMENT
210 PUBLICATION, DISTRIBUTION ETC.
214 PRODUCTION, PUBLICATION, DISTRIBUTION, MANUFACTURE STATEMENTS
215 PHYSICAL DESCRIPTION
225 SERIES
510 PARALLEL TITLE PROPER
530 KEY TITLE
856 \$u Uniform Resource Identifier (URI)

In some cases these optional fields may be needed to identify the resource, e.g. 210 PUBLICATION, DISTRIBUTION, ETC. or 214 PRODUCTION, PUBLICATION, DISTRIBUTION, MANUFACTURE STATEMENTS for 45- OTHER EDITIONS.

It is not recommended that additional fields be included.

Linking fields not constructed from a full record should contain as much of this data as possible, given the practices of the source agency.

At the least they should contain the data listed above, but need not include the record identifier.

(B) Subfields Description: Standard Subfields Technique

\$a Author

The name of the person, corporate body or family with primary responsibility for the resource to which the link is being made. This may not necessarily be the contents of a 700, 710 or 720 field for that resource if the concept of main entry does not exist in the cataloguing rules. Where more than one subfield contributes to the contents, standard punctuation should be applied ([EX 6](#)). Not repeatable.

\$b General Material Designation

The contents of the relevant subfield (200\$b) of the resource to which the link is being made. See field 456, [EX 1](#). Not repeatable.

It corresponds to General Material Designation in the ISBDs prior to ISBD Consolidated Edition (2011). According to ISBD Consolidated Edition, GMD element is not used. However it can still be carried in bibliographic records created prior to ISBD Consolidated Edition.

\$c Place of Publication

The contents of the 210\$a subfield(s) of the resource to which the link is being made. Repeatable.

\$d Date of Publication

The contents of the 210\$d subfield of the resource to which the link is being made. Not repeatable.

\$e Edition Statement

The contents of the 205\$a subfield of the resource to which the link is being made. Not repeatable.

\$f First Statement of Responsibility

The contents of the relevant subfield(s) (200\$f) of the resource to which the link is being made. See field 463, [EX 2](#). Repeatable after each subfield \$t, \$l, \$h or \$i which has an accompanying statement of responsibility or for each parallel statement of responsibility.

\$g Subsequent Statement of Responsibility

The contents of the relevant subfield(s) (200\$g) of the resource to which the link is being made. See field 463, [EX 2](#). Repeatable.

\$h Number of Section or Part

The contents of the relevant title (200) or preferred title (500) \$h subfield of the resource to which the link is being made. Repeatable.

\$i Name of Section or Part

The contents of the relevant title (200) or preferred title (500) \$i subfield of the resource to which the link is being made. Repeatable.

\$l Parallel Title

The contents of the relevant parallel title subfield(s) (200\$d, 510\$a) of the resource to which the link is being made. See field 423, [EX 2](#). Repeatable.

\$m International Standard Music Number

The contents of the 013\$a subfield of the resource to which the link is being made. Repeatable.

\$n Name of Publisher, Distributor, etc.

The contents of the relevant subfield(s) (210\$c, 214c) of the resource to which the link is being made. See field 463, [EX 2](#). Repeatable.

\$o Other Title Information

The contents of the relevant subfield(s) (200\$e) of the resource to which the link is being made. See field 463, [EX 2](#). Repeatable.

\$p Physical Description

The contents of the relevant physical description 215\$a subfield of the resource to which the link is being made. Not repeatable.

\$q International Standard Identifier for a Work

The ISTC, ISWC, or ISAN, or other international identifier assigned to the work. The first four character positions contain an alphabetic code specifying the nature of the identifier; in the case of an ISTC, an ISWC or an ISAN, this code corresponds to the letters preceding the number. Repeatable.

\$r International Standard Identifier for an Expression

The ISTC, ISWC or other international identifier assigned to an expression of a work. The first four character positions contain an alphabetic code specifying the nature of the identifier; in the case of an ISTC or an ISWC, this code corresponds to the letters preceding the number. Repeatable.

\$s Series Statement

The contents of the relevant subfield(s) (225\$a, \$h, \$i) of the resource to which the link is being made. See field 456, [EX 1](#). Repeatable.

\$t Title

The contents of the relevant title (200) or preferred title (500) subfield(s) of the resource to which the link is being made. In the case of a continuing resource, this subfield may hold the contents of the key-title (530) field. Where more than one subfield contributes to the contents, standard punctuation should be applied in the absence of a specific 4XX subfield code ([EX 6](#)). Mandatory. Repeatable.

\$u Uniform Resource Identifier (URI)

The contents of the 856\$u subfield of the record which is the source of the \$a or \$t in this field (see field 488, [EX4](#)). Not repeatable.

\$v Volume Number

The element(s) (number, position in the document) which expresses the relationship between the current resource and the resource to which the link is being made. Examples of such elements are 200\$h and 225\$v. Not repeatable.

\$x ISSN

The contents of the 011\$a subfield of the resource to which the link is being made. Repeatable.

\$y International Standard Book Number

The contents of the 010\$a subfield of the resource to which the link is being made. Repeatable.

\$z CODEN

The contents of the 040\$a subfield of the resource to which the link is being made. Not repeatable.

\$0 Bibliographic Record Identifier

The contents of the 001 field of the resource to which the link is being made. Not repeatable.

\$3 Authority Record Identifier or Standard Number

The identifier for the authority record for the access point. This subfield is for use with UNIMARC/Authorities format.

The contents of the \$3 subfield of the field which is the source of the \$a or \$t in this field. Repeatable.

\$5 Institution to which Field Applies

The contents of the \$5 subfield of the field which is the source of the \$a or \$t in this field. Not repeatable.

Notes on Field Contents: Standard Subfields Technique

If there is no record for the resource being linked to, the data in this field should be created as if that resource were being catalogued.

If a linking field contains the record identifier of the linked record, this record should be included in the same file for distribution purposes.

The order of subfields is irrelevant. But it is recommended that the \$0 subfield appears first and that the order be consistent within the database.

Related Fields

311 NOTES PERTAINING TO LINKING FIELDS	Field 311 may be used to express any of the linking relationships appearing in this block when a note is required which cannot be generated from a 4-- field. If field 311 is used, the second indicator of the corresponding 4-- field is set to 0.

vol. 2 Data of 200 field

Standard subfields technique
461 #0\$077-10346\$tCountries of Europe\$vol. 2
This example illustrates a link from a volume to a multi-volume monograph that is at the set level. The resource being catalogued vol. 2 is one piece of the set. The record for the set should be present in the same file and will have as its 001 record identifier: 77-10346. The agency creating the record does not make a note relating to the set in the record for the volume being catalogued and has therefore set the second indicator to 0. To produce an access point from this field, it may be necessary to find the record referred to in the embedded 001 field. An access point generated from the record to which this field points would appear as follows: Countries of Europe, vol. 2
EX 2
Embedded fields technique
422 #1\$12001#\$aWorld of knowledge
Standard subfields technique
422 #1\$tWorld of knowledge
A continuing resource <i>World of knowledge</i> has an annual supplement entitled <i>World of knowledge annual</i> . In the record describing the <i>World of knowledge annual</i> , a note is required to indicate this relationship. The source format records this information by linking to the resource <i>World of knowledge</i> by means of a bibliographic title entered in UNIMARC Field 422 PARENT OF SUPPLEMENT. The note created from this field might read as follows: Supplement to: World of knowledge
EX 3

410 SERIES

Field Definition and Scope

This field is used to link the resource being catalogued to a series that contains it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Field 410 contains an upward link to a series when the resource catalogued is either a series or monograph. If an upward link to both a series and its subseries is required, then the 410 may be repeated for citations to each, the higher level preceding the lower. Alternatively when the record structure emphasizes linking separate records in a hierarchy, the series may be linked through a 461 SET field and the subseries through a 462 SUBSET field.

The indicator value for this field indicates whether a note should be generated from the field; it does not contain information concerning the existence or generation of a series statement (field 225).

Related Fields

225 SERIES	Field corresponds to the ISBD Series and Multipart Monographic Resource Area. Field 410 is used for an access point form of the series entry. When the access point form is considered by the agency preparing the record to be identical to the form in field 225, the first indicator of 225 will note this. Nevertheless, the data is still included in field 410 (EX 2).
461 SET	If the 46- hierarchical links are being used then an upward link to a series may be indicated through a 461 field.
462 SUBSET	If the 46- hierarchical links are being used then an upward link to a subseries may be indicated through a 462 field.

Examples

EX 1
Embedded fields technique
225 0#\$aLetters from China
410 #0\$12001#\$aLetters from China\$1700#1\$aStrong,\$bAnna Louise,\$f1885-1970
Standard subfields technique
225 0#\$aLetters from China
410 #0\$tLetters from China\$aStrong, Anna Louise, 1885-1970
The document being catalogued is in a series for which an access point needs to be made. A series statement on the resource and recorded in the 225 field differs from the access point form of name for the series. Field 410 contains that form. No note is to be printed from field 410.
EX 2
Embedded fields technique
225 2#\$aCambridge Greek and Latin classics
410 #0\$12001#\$aCambridge Greek and Latin classics
Standard subfields technique
225 2#\$aCambridge Greek and Latin classics
410 #0\$tCambridge Greek and Latin classics
The document being catalogued is in a series for which an access entry is required by the cataloguing code. The form of entry in field 225 is the same as the established form in field 410.

411 SUBSERIES

Field Definition and Scope

This field is used to link the continuing resource (series) being catalogued to a subseries that is contained in it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is to be used only in records for continuing resources (series) to indicate a downward link to a subseries that is part of the continuing resource title recorded in field 200.

Related Fields

410 SERIES	The 411 field indicates a downward link from a series to a subseries. If the resource being catalogued is a subseries and an upward link to the series is required, field 410 is used.
462 SUBSET	If the 46- hierarchical links are being used then a subseries may be linked to a series being catalogued through field 462.

Examples

EX 1
Embedded fields technique
411 #1\$12001#\$aEngineering series\$12250#hA
Standard subfields technique
411 #1\$tEngineering series\$hA
The resource being catalogued is the continuing resource <i>Copper information</i> which has a subseries entitled <i>Engineering series</i> which is labelled <i>A</i> within the continuing resource.

412 SOURCE OF EXCERPT OR OFFPRINT

Field Definition and Scope

This field is used to identify a linked resource which was the source of an excerpt or offprint.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

An offprint or an excerpt is a unique bibliographic entity, the contents of which had already been published in another unique bibliographic entity.

Related Fields

413 EXCERPT OR OFFPRINT	Field 413 is used for the reciprocal of the relationship indicated by field 412.

421 SUPPLEMENT

Field Definition and Scope

This field is used to link the resource being catalogued to another resource that is its supplement.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used in both continuing resource and monograph records to link to a supplement.

Related Fields

422 PARENT OF SUPPLEMENT	Field 422 is used for the reciprocal of the relationship indicated by field 421.
--------------------------	--

Examples

The monograph Quadro politico di Milano has a monograph supplement Cos'è patriottismo?

422 PARENT OF SUPPLEMENT

Field Definition and Scope

This field is used to link the supplement being catalogued to the parent of that supplement.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Related Fields

421 SUPPLEMENT	Field 421 is used for the reciprocal of the relationship indicated by field 422.

422 #1\$tQuadro politico di Milano
The record for the monograph <i>Cos'è patriottismo</i> contains a link to the parent of the supplement <i>Quadro politico di Milano</i> .
A further example of the use of this field appears as EX 2 of the 4-- LINKING ENTRY BLOCK.

423 ISSUED WITH

Field Definition and Scope

This field is used to link the resource being catalogued to another bibliographic resource that is issued with it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

When one resource is issued with another, it is not implied that either resource is subsidiary to the other, as is the case with a supplement/parent relationship.

Related Fields

482 BOUND WITH	This field contains a description of the resource that is bound first in an “artificial” collection, i.e. not found with the other resources as issued.
----------------	---

Examples

424 IS UPDATED BY

Field Definition and Scope

This field is used to link the resource being catalogued to another resource that updates its content.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

The relationship expressed by field 424 is typically that between an updating loose-leaf (monograph) and its updates, usually published as a continuing resource. However, the relationship can also express the link between two continuing resources. Field 424 expresses the link from the monograph or a continuing resource to the updating publication.

Related Fields

425 UPDATES	Field 425 is used for the reciprocal of the relationship indicated by field 424.
421 SUPPLEMENT	Field 421 is used to link the resource being catalogued to another resource that is its supplement.

425 UPDATES

Field Definition and Scope

This field is used to link the resource being catalogued and that is an update to another resource that is updated by its content.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

The relationship expressed by field 425 is typically that between an updating loose-leaf (monograph) and its updates, usually published as a continuing resource. However, the relationship can also express the link between two continuing resources. Field 425 expresses the link from the updating publication to the one being updated.

Related Fields

424 IS UPDATED BY	Field 424 is used for the reciprocal of the relationship indicated by field 425.
422 PARENT OF SUPPLEMENT	Field 422 is used to link the supplement being catalogued to the parent of that supplement.

2005	New field.
------	------------

430 CONTINUES

Field Definition and Scope

The field is used to link a continuing resource being catalogued to a preceding title. Fields 431-437 are used in preference to 430 when it is required to elaborate on the “preceding” relationship.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Where an agency uses this fields, they should be distinguished as follows:

Continues: the new title replaces the earlier title without a change in numbering;

Supersedes: the new title replaces the earlier title and the numbering of the earlier one is not continued;

Absorbed: a continuing resource was in existence before it absorbed an earlier continuing resource and it continues with its own numbering.

Separated from: the new title was once a part of a still existing title.

Related Fields

44- Succeeding Entry Fields	Fields 440-445 are used for the reciprocals of the relationships identified by fields 430-435.
448 CHANGED BACK TO	This field is used to link a continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. The practice recommended by the ISSN Centre is to use fields 440 CONTINUED BY and 430 CONTINUES.
520 FORMER TITLE (CONTINUING RESOURCES)	Used when the practice is to record a continuing resource under its latest title with added entries under earlier titles. Not to be used when 430-437 are used.

432 SUPERSEDES

Field Definition and Scope

The field is used to link a continuing resource being catalogued to a preceding title. Fields 431-437 are used in preference to 430 when it is required to elaborate on the “preceding” relationship.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Where an agency uses this fields they should be distinguished as follows:

Continues: the new title replaces the earlier title without a change in numbering;

Supersedes: the new title replaces the earlier title and the numbering of the earlier one is not continued;

Absorbed: a continuing resource was in existence before it absorbed an earlier continuing resource and it continues with its own numbering.

Separated from: the new title was once a part of a still existing title.

Related Fields

44- Succeeding Entry Fields	Fields 440-445 are used for the reciprocals of the relationships identified by fields 430-435.
448 CHANGED BACK TO	This field is used to link a continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. The practice recommended by the ISSN Centre is to use fields 440 CONTINUED BY and 430 CONTINUES.
520 FORMER TITLE (CONTINUING RESOURCES)	Used when the practice is to record a continuing resource under its latest title with added entries under earlier titles. Not to be used when 430-437 are used.

Recommended usage of 430 and 440 fields instead of using the 448 field. The journal <i>Kolo</i> changed back to this title twice during its publishing history. Each time the title changes a new record is created and the records are linked by fields 430 and 440. Each title is differentiated by adding the qualifier in the key title. A further example of the use of field 430 occurs as EX 3 in the 4-- LINKING ENTRY BLOCK and EX 2 in field 488.

History

2005	Field issued/re-issued with corrections/additions.
------	--

434 ABSORBED

Field Definition and Scope

The field is used to link a continuing resource being catalogued to a preceding title. Fields 431-437 are used in preference to 430 when it is required to elaborate on the “preceding” relationship.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Where an agency uses this fields they should be distinguished as follows:

Continues: the new title replaces the earlier title without a change in numbering;

Supersedes: the new title replaces the earlier title and the numbering of the earlier one is not continued;

Absorbed: a continuing resource was in existence before it absorbed an earlier continuing resource and it continues with its own numbering.

Separated from: the new title was once a part of a still existing title.

Related Fields

44- Succeeding Entry Fields	Fields 440-445 are used for the reciprocals of the relationships identified by fields 430-435.
448 CHANGED BACK TO	This field is used to link a continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. The practice recommended by the ISSN Centre is to use fields 440 CONTINUED BY and 430 CONTINUES.
520 FORMER TITLE (CONTINUING RESOURCES)	Used when the practice is to record a continuing resource under its latest title with added entries under earlier titles. Not to be used when 430-437 are used.

Recommended usage of 430 and 440 fields instead of using the 448 field. The journal <i>Kolo</i> changed back to this title twice during its publishing history. Each time the title changes a new record is created and the records are linked by fields 430 and 440. Each title is differentiated by adding the qualifier in the key title. A further example of the use of field 430 occurs as EX 3 in the 4-- LINKING ENTRY BLOCK and EX 2 in field 488.

History

2005	Field issued/re-issued with corrections/additions.
------	--

437 SEPARATED FROM

Field Definition and Scope

The field is used to link a continuing resource being catalogued to a preceding title. Fields 431-437 are used in preference to 430 when it is required to elaborate on the “preceding” relationship.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Where an agency uses this fields they should be distinguished as follows:

Continues: the new title replaces the earlier title without a change in numbering;

Supersedes: the new title replaces the earlier title and the numbering of the earlier one is not continued;

Absorbed: a continuing resource was in existence before it absorbed an earlier continuing resource and it continues with its own numbering.

Separated from: the new title was once a part of a still existing title.

Related Fields

44- Succeeding Entry Fields	Fields 440-445 are used for the reciprocals of the relationships identified by fields 430-435.
448 CHANGED BACK TO	This field is used to link a continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. The practice recommended by the ISSN Centre is to use fields 440 CONTINUED BY and 430 CONTINUES.
520 FORMER TITLE (CONTINUING RESOURCES)	Used when the practice is to record a continuing resource under its latest title with added entries under earlier titles. Not to be used when 430-437 are used.

History

2005	Field issued/re-issued with corrections/additions.
------	--

436 FORMED BY MERGER OF ..., ..., AND ...

Field Definition and Scope

This field is used to link the continuing resource being catalogued to two or more other continuing resources which precede it and which were merged to form it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Occurrence

Optional. This field must be repeated. It is repeated for each of the previous continuing resources which merged.

Related Fields

434 ABSORBED	When two or more continuing resources are merged, but continue under the name of one of the original continuing resources, field 434 is used in the record of the continuing resource whose name did not change to link to the continuing resource which was merged and whose title no longer continues.
447 MERGED WITH ... AND... TO FORM ...	Field 447 is used in the record of one of the earlier continuing resources which is merged to link to the continuing resource(s) with which it is merged and the new title.

Recommended usage of 430 and 440 fields instead of using the 448 field. The journal *Kolo* changed back to this title twice during its publishing history. Each time the title changes a new record is created and the records are linked by fields 430 and 440. Each title is differentiated by adding the qualifier in the key title.

A further example of the use of field 440 occurs as [EX 2](#) in field 488.

History

2005	Field issued/re-issued with corrections/additions.
------	--

441 CONTINUED IN PART BY

Field Definition and Scope

The field is used to link a continuing resource being catalogued to its succeeding title. Fields 441-445 are used in preference to 440 when it is desired to elaborate on the “succeeding” relationship.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Where an agency uses this fields they should be distinguished as follows:

Continued by: the new title replaces the earlier title without a change in numbering;

Superseded by: the new title replaces the earlier title and the numbering of the earlier one is not continued;

Absorbed by: the continuing resource being catalogued ceases to exist but is continued by the continuing resource referred to in field 444 or 445, although this continuing resource continues its previous numbering.

Related Fields

43- Preceding Entry Fields	Fields 430-435 are used for the reciprocals of the relationships identified by fields 440-445.
448 CHANGED BACK TO	This field is used to link a continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. The practice recommended by the ISSN International Centre is to use fields 440 CONTINUED BY and 430 CONTINUES.

Each time the title changes a new record is created and the records are linked by fields 430 and 440. Each title is differentiated by adding the qualifier in the key title.

A further example of the use of field 440 occurs as [EX 2](#) in field 488.

History

2005	Field issued/re-issued with corrections/additions.
------	--

444 ABSORBED BY

Field Definition and Scope

The field is used to link a continuing resource being catalogued to its succeeding title. Fields 441-445 are used in preference to 440 when it is desired to elaborate on the “succeeding” relationship.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

Where an agency uses this fields they should be distinguished as follows:

Continued by: the new title replaces the earlier title without a change in numbering;

Superseded by: the new title replaces the earlier title and the numbering of the earlier one is not continued;

Absorbed by: the continuing resource being catalogued ceases to exist but is continued by the continuing resource referred to in field 444 or 445, although this continuing resource continues its previous numbering.

Related Fields

43- Preceding Entry Fields	Fields 430-435 are used for the reciprocals of the relationships identified by fields 440-445.
448 CHANGED BACK TO	This field is used to link a continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. The practice recommended by the ISSN International Centre is to use fields 440 CONTINUED BY and 430 CONTINUES.

Recommended usage of 430 and 440 fields instead of using the 448 field. The journal *Kolo* changed back to this title twice during its publishing history. Each time the title changes a new record is created and the records are linked by fields 430 and 440. Each title is differentiated by adding the qualifier in the key title.

A further example of the use of field 440 occurs as [EX 2](#) in field 488.

History

2005	Field issued/re-issued with corrections/additions.
------	--

446 SPLIT INTO ..., ..., AND ...

Field Definition and Scope

This field is used to link the continuing resource being catalogued to two or more other continuing resources which continued it and which split from it.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Occurrence

Optional. This field must be repeated for each of the new continuing resources.

Related Fields

434 ABSORBED	When a continuing resource splits into two or more continuing resources, but the title of the original is kept by one of the later continuing resources, field 434 is used in the record of the continuing resource whose title did not change in order to link to the continuing resource which was merged and whose title no longer continues.
--------------	--

Examples

446 #1\$tOfficial gazette – Imo State of Nigeria
In the record for the Gazette – East Central State of Nigeria, a note on the following lines may occur: Split into: Official gazette – Anambra State of Nigeria and Official gazette – Imo State of Nigeria

447 MERGED WITH ... AND ... TO FORM ...

Field Definition and Scope

This field is used to link the continuing resource being catalogued to other continuing resources with which it merged and to the resource which was the product of the merger.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Occurrence

Optional. This field must be repeated. The final occurrence of the field relates to the product of the merger; all other occurrences relate to resources with which the resource being catalogued is merged.

Related Fields

434 ABSORBED	When the continuing resource being catalogued is merged with one or more others to form a new continuing resource which bears the same title as the continuing resource being catalogued, the record of the resource being catalogued will contain a 434 field referring to each of the titles which is absorbed and field 447 will not be used.
444 ABSORBED BY	When the continuing resource being catalogued is merged with one or more others to form a new continuing resource which bears the same title as one of the other continuing resources, the record of the resource being catalogued will contain a 444 field referring to the title which continues, and field 447 will not be used.

--

The continuing resource Abstracts pertaining to Communist China in Soviet abstracts journals. Geology and geography series merged with Abstracts pertaining to Communist China in Soviet abstracts journals. Metallurgy and Abstracts pertaining to Communist China in Soviet abstracts journals. Mining series to form Communist Chinese scientific abstracts. The records have been linked using the preferred titles.
--

448 CHANGED BACK TO

Field Definition and Scope

This field is used to link the continuing resource being catalogued to a continuing resource which both preceded it and succeeded it. This occurs when a continuing resource changes its name and then reverts back to its earlier name. This field occurs in the record of the intervening title.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

When a title reverts back to an earlier title, the practice recommended by the ISSN Centre is to use fields 430 CONTINUES ([EX 6](#)) and 440 CONTINUED BY ([EX 2](#)).

Related Fields

430 CONTINUES	The field is used to link a continuing resource being catalogued to a preceding title.
440 CONTINUED BY	The field is used to link a continuing resource being catalogued to its succeeding title.

451 OTHER EDITION IN THE SAME MEDIUM

Field Definition and Scope

This field is used to link the resource being catalogued to another edition, state or version of that resource that is in the same medium, such as another printed edition produced in a different language, or to link a print to another impression derived from the same plate.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field may be used to link to other editions of continuing resources ([EX 1](#)) or monographs ([EX 2](#)).

Related Fields

452 OTHER EDITION IN ANOTHER MEDIUM	Field 452 also expresses links to other editions or versions of the resource being catalogued; however, these other editions are in a different medium. For example the resource being catalogued is a printed book and the other edition is in microform.
-------------------------------------	--

Examples

EX 1
Embedded fields technique
200 1#\$aCamera
451 #0\$1011##\$a0373-9740\$15301#\$aCamera\$b(Édition française)

The information in the linking field gives data peculiar to the reproduction and the 4-- field mandatory data (500 and 700). A note will be automatically generated.

History

1994	New field.
2005	Field issued/re-issued with corrections/additions.

461 SET

Field Definition and Scope

This field is used to identify hierarchically linked resources at the set level. The resource to which the link is made is at the set level, and the record containing this field is at the subset, piece or piece-analytic level.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used only when the record structure emphasizes hierarchical linking between data from various levels and when it is intended to identify, describe or indicate a resource at the set level.

A set is a group of physically separate resources identified by a common title; it includes series, continuing resources, made-up collections and multi-volume monographs.

A link from a piece or subset to a set is always an upward link.

Examples

EX 1
Embedded fields technique
200 1#\$aBuses in the East Midlands...
461 #1\$12001#\$aFleetbooks\$vno.7
Standard subfields technique
200 1#\$aBuses in the East Midlands...
461 #1\$tFleetbooks\$vno.7
A monograph <i>Buses of the East Midlands</i> is part of a monograph series. Within the record of the monograph there is a field linking to the series entitled <i>Fleetbooks</i> which is represented by its title. This resource is number 7 in the series. Note the use of subfield \$v in the embedded 200 field: although it is embedded in a reference to the monographic series, it is specific to the monograph.
A further example of the use of this field appears as EX 1 of the 4-- LINKING ENTRY BLOCK.

History

2000	Field issued/re-issued with corrections/additions.
2008	Definition changed.
2012	Changes to text.

462 SUBSET

Field Definition and Scope

This field is used to identify hierarchical links to resources at the subset level. The record to which the link is made is at the subset level, and the record containing this field is at the piece, subset, or set level.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used only when the record structure emphasizes hierarchical linking between data from various levels and when it is intended to identify, describe or indicate a resource at the subset level.

A subset is a group of physically separate resources identified by a common title, representing a section of a larger set.

Field 462 should generally be used in a record for a piece or a subset to link upward to a higher level subset. The only downward 462 link that should be used is one from a set to a subset. The set will be the highest level in the hierarchy, so the link can be downward.

A local indicator can be defined if it is desired to differentiate hyperlinked from non-hyperlinked text.

History

2005	Field issued/re-issued with corrections/additions.
2012	Changes to text.

463 PIECE

Field Definition and Scope

This field is used to identify hierarchical links to resources at the piece level. The record to which the link is made is at the piece level, and the record containing this field is at the piece-analytic, subset, or set level.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used only when the record structure emphasizes hierarchical linking between data from various levels and when it is intended to identify, describe or indicate a resource at the piece level.

A piece is a single physically separate bibliographic resource.

Field 463 should generally be used in a record for a piece-analytic to link upward to the piece that contains the piece-analytic. A set (at the highest hierarchical level) may contain a downward link to a piece using a 463 field.

Examples

2005	Field issued/re-issued with corrections/additions.
2012	Changes to text.

464 PIECE-ANALYTIC

Field Definition and Scope

This field is used to identify hierarchical links to resources at the piece-analytic level. The record to which the link is made is at the piece-analytic level, and the record containing this field is at the piece level.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used only when the record structure emphasizes hierarchical linking between data from various levels and when it is intended to identify, describe or indicate a resource at the piece-analytic level.

A piece-analytic is a bibliographic resource that is part of and not physically separate from its host resource.

Since a link to a piece-analytic is inherently a downward link, it should not be used unless the piece is at the highest level. Instead upward links to the piece should be made (using field 463) in the record for the piece-analytic.

Related Fields

327 CONTENTS NOTE	When field 464 is repeated to describe or record each resource at the piece-analytic level, and when the second indicator is set to 1 in order to generate a note from each field, it is not required to make a field 327 containing the same data.
-------------------	---

2005	Field issued/re-issued with corrections/additions.
2012	Changes to text.

470 RESOURCE REVIEWED

Field Definition and Scope

This field is used to link the resource being catalogued (a review) to the record for the resource reviewed.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field is used in piece-analytic records to link to the resource being reviewed.

Examples

EX 1

History

1994	New field.
2000	Field issued/re-issued with corrections/additions.

481 ALSO BOUND IN THIS VOLUME

Field Definition and Scope

This field contains description of other resources bound in an “artificial” collection, e.g. not found with the first resource as issued. It is generally used for older monographic publications (antiquarian).

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

This field contains a link from the first resource in an “artificial” collection to each resource after the first in that collection.

The field can contain Record Identifier of the record containing full description of the other resource bound in the “artificial” collection, and/or data of that resource.

Related Fields

316 NOTE RELATING TO THE ITEM	This field contains a note relating to the item for older monographic publications, e.g. wanting leaves, copy characteristics, binding, numbered copies of an edition, manuscript notes on title page or margins, bound leaves, items, etc.
482 BOUND WITH	This field contains a description of the resource that is bound first in an “artificial” collection. It is generally used for older monographic publications.

Three resources bound to Marcellus Daniel's *Assertiones ex universa theologia* in the "artificial" collection. The indicator value "1" in the 481 fields indicates that notes should be generated from these fields. See also examples 1 to 3 of the 482 field.

History

1996	New field.
2000	Field issued/re-issued with corrections/additions.
2005	Field issued/re-issued with corrections/additions.
2008	Field may be linked to indicate to which specific copy a specific instance of a field relates.

482 BOUND WITH

Field Definition and Scope

This field contains a description of the resource that is bound first in an “artificial” collection, i.e. not found with the other resources as issued. It is generally used for older monographic publications (antiquarian).

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Occurrence

Optional. Repeatable if the copies of the resource described in the record are bound in more than one artificial collection.

Notes on Field Contents

This field contains a link from each resource after the first in an “artificial” collection to the first resource in that collection.

The field can contain Record Identifier of the record containing full description of the first resource bound in the “artificial” collection, and/or data of that resource.

Related Fields

316 NOTE RELATING TO THE ITEM	This field contains a note relating to the item for older monographic publications, e.g. wanting leaves, copy characteristics, binding, numbered copies of an edition, manuscript notes on title page or margins, bound leaves, items, etc.

488 OTHER RELATED WORK

Field Definition and Scope

This field is used to link the resource being catalogued to another resource when the specific relationship is not provided for in the other 4-- fields or cannot be determined from the source format.

The specifications below are in addition to those given at the block under 4-- LINKING ENTRY BLOCK.

Notes on Field Contents

It is unlikely that field 488 would be used to generate a note since the nature of the relationship is unspecified.

Related Fields

311 NOTES PERTAINING TO LINKING FIELDS	Since field 488 is unlikely to be used to generate a note, any note on the relationship of the resource being catalogued to that referred to in field 488 is entered in field 311.
